Dilip for industrialized Bangladesh by 2021

Industries Minister Dilip Barua on Saturday said the present Mahajote government led by Prime Minister Sheikh Hasina would like to build an industrialized Bangladesh by 2021, reports BSS.

"Massive industrialization needs in the country to achieve the goal of the government", he told the 7th Annual General Meeting of APO (Asian Productivity Organisation) Society for Bangladesh and a national seminar on 'Cooperate Social Responsibility (CSR) for Productivity Improvement in the auditorium of Sarak Bhaban in the city.

The seminar was organised by APO Society for Bangladesh, an association of alumni, which trains its members both at home or abroad.

Industries Secretary Dewan Zakir Hussain addressed the seminar as the special guest while President of APO Society for Bangladesh Sharif M Afzal Hossain presided. DGM of SME Foundation Dr Yeameen Akbory presented a keynote paper.

Dilip Barua said the present government is going to formulate a new industry policy. The industry policy, he said, would be a coordinated one to provide guidelines on various issues, including stable production environment, production-oriented training and productivity.

The minister laid stress on maintaining a stable production environment for increasing industrial output in the country.

He said healthy and cordial working atmosphere between the owners and workers would be needed to boost production.

Dilip Barua said "Productivity in our industries could be increased to a great extent through creating a well-disciplined working atmosphere and environmental

development".

He urged the owners of industries to contemplate on how to increase productivity in the industrial sector by protecting the interests of the workers.

He said, "We can consider six working days in a week for public sector industries to increase our production".

Afzal Hossain said there is no alternative to increase productivity in the country to accelerate the pace of development in the country.

In this respect, he said honest political leadership and professional and efficient workers leaders are required for increasing the volume of national productivity.

In her keynote presentation, Dr Yeameen Akbory said productivity of the public enterprises in the country is meagre due to lack of efficiency of workers and non-utilisation of modern technology.

On the other hand, she said productivity in the private sector is increasing despite many odds.

Dr Yeameen Akbory said efficiency of workers would have to be increased through imparting them modern training and knowledge and ensuring CSR for workers to increase productivity in the industrial sector.
