9. Objective: Provide an opportunity for senior executives and responsible officers to understand the methodology and major components of ISO 50001 and enable them to reduce energy consumption and improve energy performance in organizations.

10. Background

The interest in energy efficiency is not new among organizations and companies in all sectors as well as consumer groups worldwide. Energy efficiency has been a goal for years to provide more power for economic activities and residential demand at lower cost while using less fuel. There have been some clear successes in many parts of the world, such as the growing adoption of energy-saving appliances and utilization of energy-efficient techniques and technologies. Yet more needs to be done in both the private and public sectors to facilitate energy-efficient practices and procedures in the Asia-Pacific region, where growing demand for energy supplies, emerging environmental issues, and increased stress on aging energy infrastructure have become evident.

Organizations that waste energy through lax processes and insufficient management are not only losing money but are also causing avoidable pollution through increased carbon emissions. In addition, energy security and fossil fuel depletion have become global concerns. Proper energy management through energy efficiency/conservation measures are therefore of paramount importance. This project will assist top managers to establish, implement, maintain, and improve energy management systems to achieve continual improvement of their energy performance based on the ISO 50001 standard.

- (c) Please note that nomination does not necessarily guarantee that a candidate will be selected. Selection is at the discretion of the APO Secretariat. A basic criterion for selection is the homogeneity of the participants in terms of qualifications and work experience. Nonselection therefore does not mean that the candidates concerned are not competent. Sometimes candidates are not selected because they are overqualified.
- (d) Each nomination should be accompanied by the documents listed below. A nomination lacking any of these documents may not be considered.

form. However, for all others, medical certification by a recognized physician on the reverse side of the medical form is required.

- (e) Member countries are encouraged to submit the necessary documents electronically as mentioned in (d)-(i). In that case, there is no need to send a hard copy by postal mail. However, if the documents are submitted by fax, member countries are requested to mail the originals of the documents to the APO Secretariat as well. If a digital photograph of a nominee is not attached to the electronic biodata form, a hard-copy photograph should be sent to the Secretariat by postal mail. Please specify the candidate's name and the project code on the reverse side of the photograph.
- (f) Member countries are requested to abide by the nomination deadline specified in Section 7 on the first page. The APO may not consider late nominations as they have in the past resulted in considerable difficulties to the implementing organization in its preparatory work for the project.
- (g) Under normal circumstances, candidates who are selected after the initial screening will be informed of their acceptance at least four weeks prior to commencement of the project.
- (h) Member countries are requested to inform candidates that, once selected, they are not to bring family members or to engage in any private business activities during the entire duration of the project.
